

## Environmental Requirements for the Manufacturing Industry

### Welcome to Mayfair Training

*"To **connect** organisations and individuals to professional certified training solutions"*

Mayfair Professional Academy (MPA) is the body established to meet our vision. MPA offers three routes to certification:

- *Mayfair Certification*
- *Certified Business Programmes*
- *Professional Certification*

Each route has been specifically chosen to ensure that the diverse and wide needs of customers are met. Experience shows us that clients require outstanding academic programs, professional recognition and also bespoke customised solutions. All our solutions are focused on the knowledge and skills needed to perform in the real-world.

The challenges facing individuals and corporations are continually changing and we endeavour to focus on general management skills, business skills, and project management personal effectiveness with a focus on leading to Certification.

## Environmental Requirements for the Manufacturing Industry

### Module Overview

---

This course is an introduction and overview of the increasingly important environmental concerns in the Manufacturing Industry. It introduces delegates to some of the sustainability tools available to the manufacturing industry and the key elements of an Environmental Management System (EMS) and how you can make them work for your business. We will go through in detail Key Performance Indicators and how they can be used to track and improve performance. This course also introduces risk assessment and delegates will have an appreciation of risk assessment methodologies and be able to select one appropriate to their organisation.

### Duration

This is a one-day course.

### Module Content

Topics covered during the course include:

- Understand the environmental issues facing the manufacturing industry, including impact on the environment and community.
- Have an appreciation of the environmental legislation relevant to the manufacturing industry.
- Understand some of the sustainability tools available to the manufacturing sector, such as “clean technology”, “life cycle analysis” and “BAT”.
- Understand the key elements of an Environmental Management Systems (EMS).
- Understand how to respond to environmental incidents.
- Understand what is required for a risk assessment.
- Outline the controls necessary to measure, manage and report carbon or energy for an environmental management program.

This course is subject to change
